

I greet you in the divine name of His Imperial Majesty Emperor Haile Selassie I.

Jamaicans should inspire a national movement to feed the hungry, shelter the homeless, cloth the naked, protect the elderly, and care for the infants.

Building low-income homes provides the industrialization for the population. All the existing skilled workers can be the journeyman and mentors for the young men and women apprentices willing to work in those fields.

Education will spawn excellence from womb to grave. Growing food is the foundation of any civilization; if we cannot feed ourselves then we are at the mercy of those that provide us our food. Clothing is necessary, but if taken too far becomes materialistic. We need to have the proper attire for the professions in which we are engaged. Above that, we are contributing to the exploitation of the precious resources of our planet.

Protection of the elderly means protection of us all. Laws are instituted to prevent chaos. When laws are indiscriminately broken, there is no security for anyone, therefore it is incumbent upon all law abiding and law enforcing persons to uphold the law where we live and work, not according to our personal standards, but to the standards written in our constitution. This means, no more "under the table deals" because transactions need to be transparent so that *all* stakeholders feel that fairness is at hand. Let's stop the destructive cycle of secrecy that pits one against the other because one thinks another has gotten a better deal. If all sides understand how we progress and grow together it will be more beneficial and safer for us all.

Population is only a problem if we fail to plan. The aforementioned statements are not a plan, but a framework that Rastafarian people have been putting forth for almost 100 years now. Do for self! Educate, liberate, repatriate, and restore our Constitutional Monarchy in Ethiopia. We can only help others when we are able to help ourselves. Unfettered reliance on outside assistance is major impediment.

Jamaica has one of the most ambitious people in the world. We defeated the Spanish, we defeated the British, and we can surely defeat the *Capitalistic* ideology of "kill or be killed". Our youths are smarter than that and with their active participation; we can all live in peace and love. This is not an illusion, it is a reality exemplified by our glorious heritage of past civilizations and will be a reality again.

Criminals or transgressors let their own personal drive for power corrupt their thinking and those around them. Corruption occurs as a result of inaccurate foundation for advancing our thinking and our actions. If we don't know our history

we cannot advance forward to our rightful place as servants in and to the Kingdom of God.

I suggest that everyone, especially Africans on the continent and in the diaspora, start by reading the autobiography of Haile Selassie I and learn about our Emperor. It must be required reading within every elementary, secondary, high-school, and university in the world as His Imperial Majesty Emperor Haile Selassie I leads the world with the example and instruction set forth in his utterances and writings.

Whatever we set out to do, we do to the best of our capabilities; especially leading in a manner that is conducive to producing a civilization! It is now high time that our vision, "Out of Many One People", manifest itself. A historical event for Jamaica and the world was completed as "The Church of Haile Selassie I (Incorporation and Vesting) Act, 2013" (No. 30-2013), was passed by the House of Parliament on October 25, 2013 and signed into law on November 28, 2013, giving The Church of Haile Selassie I legal status in Jamaica.

Acento Foxe's long-standing leadership, spiritually, as Abuna of The Church of Haile Selassie I; and politically, as President of the Imperial Ethiopian World Federation, represented by the Imperial Ethiopian World Federation Political Party (I.E.W.F.P.P.), is now established as a legal entity to provide spiritual awakening and political enlightenment, respectively. According to the words of Haile Selassie I, "As Ethiopia's faith reposes in God; she knows that God's judgement will prevail over that of man. ...the people are unceasingly bringing their prayers before God, that He should be their leader and that He should grant a fruitful result to the exertions which all those in government are making to preserve peace."

I look forward to the meeting of our minds...

Jah Guide and Protect!

I am Malchijah.
